SUBJECT: INTERNSHIP OPPORTUNITY AS JUNIOR CYBERSECURITY EXPERT

Dear Hiring Team,

I hope this email finds you well. I am writing to express my keen interest in an opportunity to intern as a Junior Cybersecurity Expert at your organization. With a degree in Information Technology and substantial experience in IT support, alongside my current role as a System Administrator, I am eager to pivot into cybersecurity, driven by a deep-seated passion for the discipline.

My particular interest lies in the realm of social engineering, specifically in educating employees and the broader public about the importance of identifying and mitigating phishing attacks. Despite significant advancements in security standards, procedures, and systems, social engineering remains a notably vulnerable aspect of technology. In the words of Kevin Mitnick, in his book *The Art of Deception*, **the human factor is truly security's weakest link**. I am committed to helping bridge this gap through awareness and education, which is critical for bolstering our collective cybersecurity posture.

Interning at Farsight Africa represents an invaluable opportunity for me to learn from the most esteemed professionals in the field of cybersecurity. I am enthusiastic about the prospect of contributing my skills and knowledge while gaining hands-on experience that would be instrumental in shaping my career trajectory.

Thank you for considering my application. I am looking forward to discussing how my background, skills, and aspirations align with the goals of Farsight Africa. Please find my resume attached for your review.

Warm regards,

Dennis Tanui.
